Experience

Software Engineer at Wealthsimple

February 2026 – Present

Toronto, ON

- Own the Corporate Actions workflows that process major company events (dividends, mergers, stock splits) for 4M+ customers
- Build backend services that keep trade processing reliable across Wealthsimple's investment products
- Build internal tooling the Operations team uses to run day-to-day trade operations

Software Engineer at Amazon

September 2022 – February 2026

Toronto, ON

- **Goodreads**: integrated a new payment system into Giveaways and led brand-safety work for advertisers on a platform of 150M+ members
- **Fulfillment by Amazon**: owned end-to-end projects to streamline and safeguard how third-party sellers send inventory into Amazon's network
- **CloudFront (AWS)**: spent 2 years on a tier-1 CDN, automating maintenance of 14,000+ hosts across its global Points of Presence

Software Engineer at Publicis Sapient

September 2021 – September 2022

Toronto, ON

- Embedded with Goldman Sachs to build key features for its advisor platform, serving ultra-high-net-worth clients in Asset Management
- Designed, built, and shipped across 5 production projects for one of the world's largest investment banks
- Promoted to L1 engineer in under a year

Developer Intern at 3Pillar

May 2020 – September 2020

Toronto, ON

- Built full-stack features in React, Spring Boot, and PostgreSQL on an agile team delivering custom enterprise software
- Co-developed a decision engine designed to be deployed across client companies to handle complex business logic
- Worked across the whole stack, from UI to data layer, through the full development lifecycle

CS Teaching Assistant at Queen's University

September 2019 – July 2021

Kingston, ON

- Selected 5 times as a TA for C++, Java, and Python courses based on academic performance, supporting classes of 200+ students
- Held weekly office hours for students working through intermediate and advanced programming assignments
- Helped deliver course content and grade work across multiple semesters

Education

Queen's University Kingston, ON

September 2017 – April 2021

Bachelor of Computing (Hons) in Computer Science

Relevant coursework: Data Structures, Algorithms, Software Architecture, Software Development, Databases, and more.
